

Connect a Custom Domain Guide

1. Open the domain registrar (GoDaddy, ResellerClub etc.) account for the desired domain
 2. Open the DNS manager
 3. Change the A Record to the following: **54.217.204.250**
 4. Add the following CNAME Record: 'www' (or change it if you already have a CNAME Record for 'www')
 5. Save your changes
- It usually takes between 24-48 hours for the changes to propagate.
